Continuous Drain Grate Covers

- Prevents Breakage, Noise, and Theft
- Custom Sized, Laser Cut Steel
- Covers and Complete Drain Installs
- Standard Manhole and Drain Covers

Before ...

Worn drains and grates requiring constant service and posing a constant hazard.

After ...

Complete replacement of the drain trough or just the drain cover.

Drain Repair or Replacement

Trough drains are especially prone to wear and damage as they constantly have vehicles driving over them. They break down in stages starting with the grates, then the grating seats, and finally the trough itself.

Our custom continuous drain grate covers can repair the first 2 stages of breakdown. Continuous grates are built as one single piece of laser cut steel and anchored securely in place over the drain trough.

The advantage of a continuous grate is prevention of theft, noise and breakage. They also protect the trough drain below and prevent it from further damage. It performs especially well in high traffic areas or areas where heavy delivery trucks frequently crossover the drain.

For cleaning the drain, a flush mounted access cover is installed in one end which allows you to easily flush the drain out.

If your entire trough drain needs replacing, we can excavate the old drain and install a new one complete with concrete foundation and the necessary plumbing tie-in.

Laser Cut Precision

And innovative designs proven to work and stand up against heavy use.

Custom Grates & Drain Covers

Replacing the irreplaceable. If you need a drain cover that is no longer made, call us.

Custom Fabrication Work

Sometimes, older or obscurely sourced drain covers can not be replaced. This is especially true for odd sized or shaped drain covers.

We can replace your missing or damaged covers with new ones custom fabricated in steel or stainless steel.

If you need standard types of commercial and municipal grade manhole and drain covers for your parking lot or property, we will replace those for you quickly.

As with trough drains, we do complete repair of all types of damaged drain systems.

Serving Property Managers Since 1994
