Full Colour Storefront Graphics bring Vacant Units to Life

One of the strongest performing tools you can use to provide security and create leasing opportunities while combating the blight of vacant commercial units in your malls.

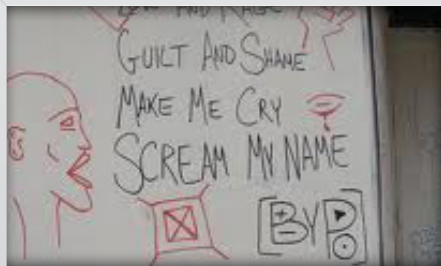

1. Security

Vacant units are vulnerable to break and enter crimes, where thieves are looking to steal copper wiring and piping, or contents and fixtures left behind by previous tenants.

And plain window papering makes them prime targets for graffiti, while making the storefront look just slightly less than abandoned.

Full colour window graphics create a "lived in" atmosphere that greatly stems those problems.

Vacant Unit Privacy and Security

2. Curb Appeal

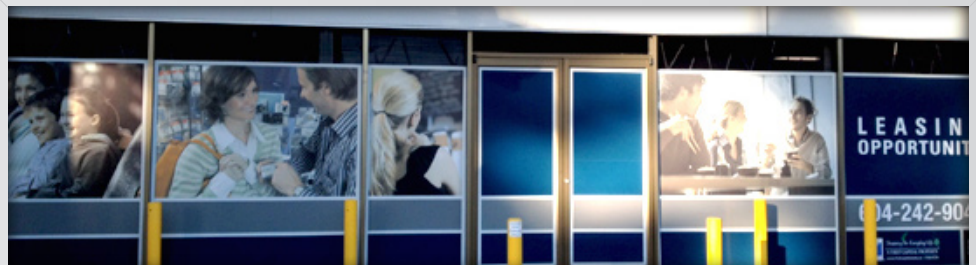

Urban blight, especially where multiple vacancies are present, can cause shoppers and prospective tenants to go elsewhere. At the same time, it attracts the wrong kind of people.

At Signs BC, we like to create window graphics that effectively promote a cheerful shopping experience; that are populated with bright images of people shopping ... but we can put together any style or theme that you want, to create a welcoming atmosphere for patrons.

Vacant Unit ... Before

Vacant Unit ... After

3. Opportunity

Along with mall beautification, attracting new tenants to vacant spaces is critical.

Full colour window graphics allow you to use your empty space as billboard advertisements to bring in those tenants.

Let us help you put together attractive window signage that ensures no opportunity is wasted. We can make full storefront leasing signage, or a combination of feel-good graphics and leasing contact information.
