

- Handicap Operator Repairs & Service
- Preventive Maintenance
- 24/7 Emergency Service

## Automatic Door Operator Installation and Repairs

Our handicap door operators are open eco-system, commercial grade units. Any automatic door technician can repair the operators we install, giving you many options for service, repair and maintenance in the future.

And we stock all the parts necessary for new installations and repairs to get you up and running as fast as possible.

Fortress One also provides a complete service. We have automatic operator / door technicians, certified electricians to run power to new operators, access system interface techs to connect to your building system, metal fabricators for railings, and carpenters to make any drywall repairs for hidden wiring. There are no surprises, just everything you need.

## Quarterly / Semi-Annual Preventive Maintenance Service

Your operator is getting a 10x increase in use since pre-2019. To extend its usable life time, it is important to have it serviced regularly.

- Lubrication of moving parts
- Tune-up of back-check and latching for smooth operation
- Servicing door latch
- Check electric strike for proper closing
- Tighten up all mounting hardware
- Replace batteries in wireless actuators and control timer
- Safety devices check
- Minor repairs will be performed at no extra charge

Fortress One Security provides 24 hour Emergency Service for commercial handicap operators. Regular maintenance service has been proven to reduce expensive break downs and increase equipment service life. By allowing us to service your handicap doors on a regular schedule, you are not under any contractual obligation and you can cancel this maintenance program at any time for any reason.

Fortress One Security also does repairs, replacement, retrofits of non-automatic doors, and new installations. Our techs are available 24/7
